BOOKS Hebrew Fragments in European Libraries

About the project Partners Researchers Hebrew fragments databases Institut

About the project

"Books within books: Hebrew Fragments in European Libraries" is a European network working on fragments of medieval Hebrew books and documents recovered from book bindings in various libraries and archives in Europe, Israel and USA. Hebrew manuscripts are unique witnesses of Jewish presence and intellectual activities in medieval Europe. Only a few of the books and writings produced in the past have been preserved. The corpus of fragment bindings has considerably enriched our knowledge of medieval Hebrew manuscripts. The fragments have been identified in various libraries and collections in Austria, England, France, Hungary, Italy, Poland, Slovakia, Spain, Switzerland and Czech Republic. The richness of the corpus, referred to as well as the "European Genizah", by analogy to the treasure trove recovered from the Cairo Genizah, offers a unique opportunity to reconstruct the history of the Jewish communities in Medieval Europe.

Pinakes

This database provides information on the manuscript tradition of pre-sixteenth century Greek texts. The project began in 1971 at the Pontifical Institute of Mediaeval Studies in Toronto; in 1993 the Greek section at the IRHT took over its management and continues to enrich it with new data to this day.

Manuscripta Medica

This database, originally designed to describe the medical manuscripts held at the BnF (over 500), will be expanded to include Latin medical manuscripts that are held at other French libraries. The resulting data will be compared to those found in other major European libraries with particular attention given to translations of Greek and Arabic medical texts into Latin in the 11th to 14th centuries.

Thecae

Corpus d'inventaires anciens de livres manuscrits et imprimés

La collection Thecae, publiée par les [Presses universitaires de Caen \(PUC\)](#), a été définie et mise en œuvre par l'Equipex [Bibliissima](#), observatoire du patrimoine écrit du Moyen Âge et de la Renaissance. Dédiée à l'histoire de la transmission des textes et des livres, elle réunit deux séries complémentaires : Thecae-Textes qui accueille des éditions d'inventaires médiévaux et modernes, du VIII^e au XVIII^e siècle, et Thecae-*Instrumenta* qui publie des répertoires de sources sur le principe des *Bibliothèques de manuscrits médiévaux en France* paru en 1987 aux éditions du CNRS.

Thecae a été préparée par des décennies de recherche à l'[Institut de recherche et d'histoire des textes \(IRHT\)](#) et construite avec la collaboration du [Centre Michel de Bouïard](#) et de la [Maison de la recherche en sciences humaines \(MRSH\)](#) de Caen. Avec Thecae, la France se dote du premier corpus électronique d'inventaires anciens de livres et elle met ainsi à la disposition du public un outil permettant d'étudier la transmission des textes sur un temps long et de façon totalement transversale.

Digitisation programme at the BnF

Following is a list of **manuscripts held at the Bibliothèque nationale de France that have been or that will be digitised** with funding from the Biblissima project. All of the manuscripts are included in various Biblissima [research programmes](#). This list is also maintained by the "Codicologie, histoire des bibliothèques et héraldique" section at the IRHT on the *Libraria* website: www.libraria.fr/fr/node/2819

The digital library of the Mont Saint-Michel

[An exceptional collection...](#)

THE HERITAGE LIBRARY OF AVRANCHES preserves 205 medieval and modern manuscripts, and 1254 printed books coming from the abbey of Mont Saint-Michel in addition to some thirty works listed in various institutions in France and abroad. The preserved documentary collection remains exceptional, despite losses and dispersion.

[... for the History of the monastic library](#)

BOOKS play a key role in the religious life of the benedictines, either they be a support for prayers and meditation, or they record the memory of the abbey during its major events as well as its daily aspects. The surviving books of the scriptorium and the abbey's library are thus the essential resources to understand the history of the monastic community of the Mont, through its liturgical practices and its spiritual, intellectual or material concerns.

[... for the History of the public libraries](#)

DURING THE REVOLUTION, the books of religious congregations were nationalised. To ensure that the nation's literature studies were fully recorded, the confiscated collections were gathered in the « literary trusts » which from 1794, became public libraries to serve as an educational tool for the citizens. The books of Mont Saint-Michel therefore became part of the new history. Their future in Avranches illustrates the history of the municipal libraries in an exemplary manner, since the utopian project which led to their creation till the contemporary policies based on the conservation and enhancement of the written heritage.

[... accessible from the digital library of the Mont Saint-Michel](#)

Catalogues et inventaires de bibliothèques ecclésiastiques d'Ancien Régime (XIV^e -XVIII^e s.)

Boétie's library following the discovery of a sub-collection of books which belonged to him, most notably within Montaigne's own library.

Online Benedictine Library of Saint-Amand Abbey (8th-18th Centuries)

Led by the Bibliothèque municipale de Valenciennes in partnership with the Centre Jean Mabillon (ENC), the Institut d'Histoire Moderne et Contemporaine (CNRS), the Institut de Recherche et d'Histoire des Textes (CNRS), the Faculté des arts et des sciences de l'Université de Montréal and the Laboratoire CALHISTE de l'Université de Valenciennes et du Hainaut-Cambrésis, this project will reconstruct and produce a digital online edition of the library catalogue of the former Saint-Amand Benedictine Abbey (also called Elnone Abbey) from its origins through to the end of the Ancien Régime. An estimated total of 350 manuscripts and 3000 early printed books are still in existence today, of perhaps 10,000 books total at the time of confiscation during the French Revolution.

Mazarin's Library, Online

Led by the Bibliothèque Mazarine in partnership with the Centre Jean Mabillon (ENC), the Pôle Document numérique at the MRSH de Caen and the Department of Manuscripts at the BnF, this project proposes an online critical edition of the catalogue records for Mazarin's library (1602-1661), which will allow for a virtual reconstruction of the collection, advanced searching of the content and the identification and location of those manuscripts and early printed books which subsist today. The project focusses on the inventory of the library which was drawn up in 1661, in the weeks following Mazarin's death (27,000 printed books and just over 2,000 manuscripts).

Provenance Information on French Library Collections

Led by the Bibliothèque de l'Institut de France in partnership with the bibliothèque de la Cour de cassation, the Bibliothèque Mazarine, the bibliothèque du Ministère des Affaires étrangères, the Bibliothèques municipales de Besançon, de Lyon et de Nancy, the Réserve des livres rares at the Bibliothèque nationale de France, the Bibliothèque Sainte-Geneviève, the CESR, the Centre Gabriel Naudé, the Institut d'histoire du livre and the Service commun de documentation du CNAM (Pôle patrimoine), this project will develop a joint online tool that draws together provenance information on the manuscripts and printed books (primarily those printed

proposes to combine automated image analysis with detailed scientific study in order to develop a virtual library for the historical province of Poitou and provide in-depth analysis of the circulation of books through the identification of their origins and provenance.

Online Library of the Dominicans of Toulouse

Led by the Bibliothèque municipale de Toulouse in partnership with the Institut de recherche et d'histoire des textes, this project aims to study the library of the first major establishment of the Dominican order, which was founded in Toulouse in 1215 and existed until 1789.

Collatinus is a free multi-OS (Mac, Windows, Ubuntu and Debian GNU/Linux) and open source application that is easy to install and use.

Collatinus is both a lemmatiser and a morphological analyser for Latin texts: if a conjugated or declined form of a word is entered, it is capable of finding the correct root word to search for in the dictionary and then displaying its translation into another language, its different meanings, and any other information usually found in dictionaries.

In practice, Collatinus will be useful mostly for Latin teachers and professors who can quickly generate a complete lexical aid for any text and distribute it to their students. Students often use Collatinus as a reference when reading Latin texts, as they develop their vocabulary and language skills.

XML Editing Tools

XML editing tools and environments (EAD and TEI)

The "Pôle Document numérique" of the [MRSRH](#) at the University of Caen-Normandie is developing several tools and environments to work in XML on ancient documents:

- for the digital edition of historical sources in [TEI](#),
- for the cataloguing of manuscripts and printed books in [EAD](#),
- for the electronic publishing.

Several of these tools, developed in the framework of [Bibliissima](#), are used for the edition and publication of **Thecae**, the *Collection of inventories of medieval and modern books (8th - 18th century)* at the Presses Universitaires de Caen (forthcoming).

The tools presented below use the [XMLMind XML Editor \(XXE\)](#), a software developed by [Pixware](#):

Download XXE (available on Windows, Mac OS and Linux).

[Edit old inventories in XML-TEI](#)

[Catalogue manuscripts and printed books in XML-EAD](#)

[Work in collaboration](#)

[Publish, disseminate](#)

Catalogue manuscripts and printed books in XML-EAD

As part of the creation of the [Virtual Library of the Mont Saint-Michel](#), but also for the project [Route du livre italien ancien en Normandie](#), [Bibliothèque historique du ministère de l'agriculture](#) and [Dicomarine](#), members of the Pôle Document numérique at the MRSRH of Caen have been working on the **XML-EAD encoding of book descriptions** and have developed a **working environment for the XML cataloguing of manuscripts and ancient books**.

[Download the cataloguing environment](#)

[XML editing tools and environments in EAD and TEI](#) (used by Thecae)

BOOKS Hebrew Fragments in European Libraries

About the project | Partners | Researchers | Hebrew fragments databases | Institut

About the project

"Books within books: Hebrew Fragments in European Libraries" is a European network working on fragments of medieval Hebrew books and documents recovered from book bindings in various libraries and archives in Europe, Israel and USA. Hebrew manuscripts are unique witnesses of Jewish presence and intellectual activities in medieval Europe. Only a small part of the books and writings produced in the past have been preserved. The corpus of fragment bindings has considerably enriched our knowledge of medieval Hebrew manuscripts. The fragments have been identified in various libraries and collections in Austria, England, France, Hungary, Italy, Poland, Slovakia, Spain, Switzerland and Czech Republic. The richness of the corpus, referred to as well as the "European Genizah", by analogy to the treasure trove of fragments recovered from the Cairo Genizah, offers a unique opportunity to reconstruct the history of the Jewish communities in Medieval Europe.

MARE CONGELA

The Biblissima Portal (in a nutshell)

DEVCALI
DONIA

Main features

- Focus: history of collections / transmission of texts in the Middle Ages and the Renaissance
- aggregates specialized data on medieval manuscripts and early printed books
- search, browse, visualize
+ query and export...

Overall Development of the portal

- Publicly online since April 2017
- 6 major updates in 21 months (development log: beta.biblissima.fr/en/dev-log)
- from 4 to 11 data sources, integrated and interlinked

Current data scope: 11 sources

- Bibale
- CRII (Regional Catalogues of Incunabula of the French Libraries)
- Europeana Regia
- Esprit des livres
- Manuscripta medica
- RegeCart
- Bibliothèques françaises
- BnF Archives et manuscrits
 - ◆ Arsenal Library
 - ◆ Mss' department
- Wellcome Library (only medieval manuscripts)
- Mandragore
- Pinakes

Current volume of data (January 2019)

486842 results

18567  Early Printed Books

95094  Manuscripts

59748  Texts

27874  People

3655  Organisations

5893  Places

74  Multi-volume manuscripts

8185  Historical Collections

24316  Descriptors

23534  Works

6936  Marks

7147  Editions

205165  Illuminations and decoration

654  Inventories

- About 500,000 “entities” (web pages)
- 95,000 manuscripts / 18,000 incunabula / 7000 editions
- 205,000 illuminations (from Mandragore)

All Biblissima

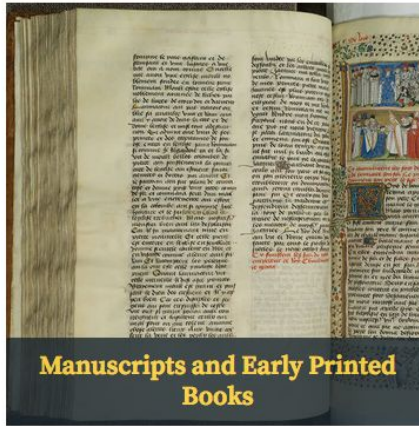

This portal is a virtual library of libraries: discover the history of various texts and books that were written, translated, illuminated, collected and catalogued from Classical Antiquity through the 18th century.

Jodocus Badius Ascensius (1461?-1535)
Josse Van Asche (1461?-1535)
Badius, Josse, 1462-1535 [editor]

Notes : Imprimeur-libraire ; imprimeur de l'université (1507-1534). - Probablement né à Gand en 1461 ou 1462. Après des études à Gand et à Louvain, il séjourne et étudie en Italie et vient professer à Valence, puis de 1492 à 1498 à Lyon, où il est correcteur d'imprimerie chez Jean Trechsel dont il épouse la belle-fille (H)ostelye Philippe. S'installe en 1499 à Paris, où il ouvre son atelier d'imprimerie en 1503. Humaniste et professeur de belles-lettres à l'université ; auteur de plusieurs ouvrages et éditeur intellectuel de plus de 110 textes. Publie aussi sous les raisons : "In aedibus Ascensianis" ou "In officina Ascensiana". Décédé à Paris en déc. 1535. Père de l'imprimeur-libraire Conrad Bade et beau-père des imprimeurs-libraires Robert I Estienne, Jean de Roigny, Michel de Vascosan et Jacques I Du Puis (*Source : BnF*)

Interoperability
Framework

iif.io

IIIF?

A **community**,

... that develops **Shared APIs**,

... implements them in **Software**,

... and exposes interoperable digital **Content**

IIIF Vision

Create a global framework by which image-based resources

... can be delivered in a standard way from any participating institution

... via any compatible image server

... for display, manipulation and annotation in any application,

... to any user on the Web.

IIF Community

Consortium of 55 institutions (January 2019)
100+ organisations involved

Biblissima's commitment to IIF

- actively involved in the IIF initiative since 2013
- first French-speaking IIF outreach event (Paris, March 15th, 2018)
- demos and implementation into the portal
- technical advisor for the 3 digital libraries in the initial scope of Biblissima, and beyond...

Biblissima portal
(Mirador viewer)

The use of IIF in the Biblissima portal

- About 15,000 books viewable on the portal via IIF (January 2019)
- 13 IIF sources :
 - ◆ Gallica-BnF, BSB, Library of Congress, Archive.org, Universität Heidelberg, e-codices, Biblioteca Apostolica Vaticana, Bodleian Libraries, Wellcome Library, Numistral, WDL, BVMM, Harvard University

More info: beta.biblissima.fr/fr/info-iiif

What do we need?

- Standardized way to request and display digital objects
- Consistent data model and common exchange format
- Normalized data based on authority files

Data modeling, mappings, transformations

- Background work on an ontology based on CIDOC-CRM and FRBRoo (2013-2016)
- In-house XML format ("pivot") to get the data from the different partners
 - ◆ define custom mappings for each data source
- Data model of the web application behind the portal (*Cubicweb* framework)

What do we need?

- Standardized way to request and display digital objects
- Consistent data model and common exchange format
- Normalized data based on authority files

Data clustering and normalisation

- Disambiguate and merge entities
- Align to linked open authority files and datasets
- Mint unique and stable identifiers

Publication in progress...

Biblissima authority data

- To be published gradually in 2019 on an open and collaborative platform...
 - ◆ first dataset: persons and corporate bodies (February 2019)
- Central hub to manage and share the data:
 - ◆ wiki-based technology (collaboration, versioning...)
 - ◆ assign identifiers (URIs)
 - ◆ natively structured as RDF
 - ◆ Web API + SPARQL endpoint, to enable sharing and reuse
