## Wellcome Arabic Manuscripts Online

The Arabic manuscripts collection of the Wellcome Library (London) comprises around 1000 manuscript books and fragments relating to the history of medicine. For the first time this website enables a substantial proportion of this collection to be consulted online via high-quality digital images of entire manuscripts and associated rich metadata.

This has been made possible by a pioneering partnership between the [Bibliotheca Alexandrina](#), the [Wellcome Library](#), and [King's College London](#), with funding from the [JISC Islamic studies programme](#).

These manuscripts are part of the Wellcome Library's Asian Collection, which

## Using this site

This website supports **search and browse functionality** using either the search bar or by browsing facets in the "[Browse and Find](#) page".

**Cover-to-cover manuscript images** can be viewed alongside the catalogue records, including links from the metadata to specific relevant images.

Two manuscripts - both images and metadata - can be **compared side-by-side**.

Some aspects of the manuscripts have been **transcribed in Arabic script**, including significant **front matter** (incipit, basmala, etc.), **back matter** (explicit, colophon), and in many cases the **complete listing of content headings** found in the text.

**Sharing and bookmarkable URLs** are enabled
