# A Service to Support and Promote IIIF in France

Bern IIIF Showcase Event

Swiss National Library, Bern, Switzerland - May 15<sup>th</sup>, 2019

Biblissima li 💿

@biblissima

**Régis ROBINEAU** @regisrob

Ш

- → Expertise service around IIIF standards:
  - launched in November 2018
  - co-operated by Biblissima, the Campus Condorcet and Huma-Num
  - offers consulting, hosting and development services
  - aimed at higher education/research and cultural heritage institutions

# Biblissima ("Bibliotheca bibliothecarum novissima")

- → Data facility for historians of ancient texts
- → 10 partners, including the Archives nationales (since 2017)
- → International collaborations: IIIF, Wellcome Library, MMM...

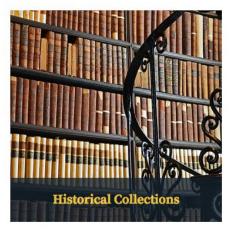

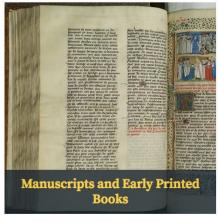

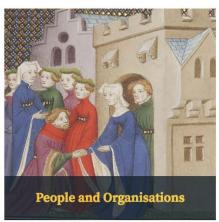

- → Federate digital libraries
- → Facilitate access to and reuse of data
- → Structure data corpora and research communities
- → Train researchers

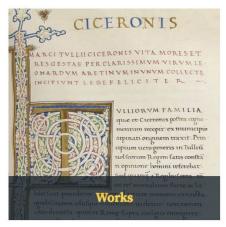

#### **Explore**

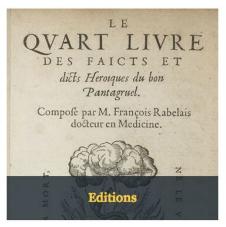

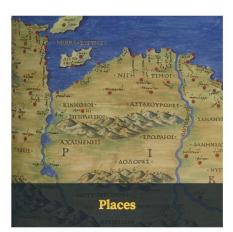

beta.biblissima.fr

- → Focus: history of collections / transmission of texts in the Middle Ages and the Renaissance
- aggregates specialized data on medieval manuscripts and early printed books
- search, browse, visualize+ query and export...

About

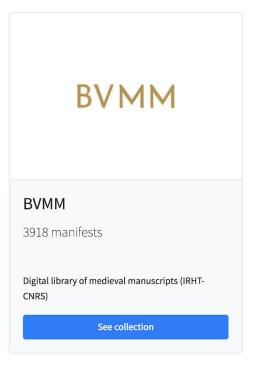

#### Search for interoperable digitized manuscripts and rare books...

This prototype application allows you to search across IIIF-compliant manuscripts and rare books dated before 1800 coming from many digital libraries in the world. It is a work in progress, the platform will be updated and enriched on a regular basis. Read more...

#### Browse collections

IIIF-Collections platform: iiif.biblissima.fr/collections

# IIIF Collections - Manuscripts & Rare Books

- → search and discovery prototype for interoperable manuscripts and rare books (prior to 1800 only)
- → aggregates data from 8 IIIF-compliant digital libraries:
  - Gallica, Digital.Bodleian, BVMM, e-codices, Europeana Regia, British Library (Polonsky project), Parker Library (CCC, Cambridge), Bibliothèque Mazarine
  - and more to come very soon:Manuscripts from Cambridge and Durham universities

# The Campus Condorcet

- → An international research campus in Humanities and Social Sciences being built in Aubervilliers and Paris
- → Brings together 11 internationally renowned institutions
- → Opens soon in 2019

www.campus-condorcet.fr

# The Campus Condorcet

- → Long term key figures:
  - ♦ 100 research units
  - ♦ 12.000 students
  - 4 200 teachers-researchers
  - 900 administrative staff
  - ◆ 2 auditoriums and a wide range of seminar rooms
  - 1 research library, 1 million documents

#### Huma-Num

- → French *Very Large Research Infrastructure* ("Très Grande Infrastructure de Recherche", TGIR)
- → Supported by the CNRS, Aix-Marseille University and the Campus Condorcet
- → Provides services, assessment and tools for digital research data of HSS research communities

www.huma-num.fr

## Huma-Num: services and tools

- → Cloud storage
- → Long-term preservation
- → Web hosting
- → Provision of software: text/image/sound/video processing tools, GIS, commercial licences...
- → ISIDORE (search engine)
- → NAKALA (data repository): <a href="https://www.nakala.fr/index.html.en">www.nakala.fr/index.html.en</a>
- → NAKALONA (SaaS, package which connects Nakala and Omeka)

#### IIIF in France: main promoters/implementors

- → French National Library (BnF)
  - ◆ IIIF Consortium member
  - ◆ Gallica digital library
- → C2RMF (*IIPImage server*)
- → University of Caen
- → Private companies: Teklia, i2S (*LimbGallery*)
- → Biblissima
- → Huma-Num

### Biblissima's commitment to IIIF

- → actively involved in the IIIF initiative since 2013, IIIF TRC community member
- → first French-speaking IIIF outreach event (Paris, March 15th, 2018)
- → demos and implementation into the portal
- → technical advisor for the 3 digital libraries in the initial scope of Biblissima, and beyond...

Biblissima-BnF-Stanford Viewers Interoperability
Meetings (May 13-17th, 2013)

frama.link/iiif-paris-2013

Biblissima and IIIF Day: *Innovating to Rediscover the Written Cultural Heritage* (Campus Condorcet - March 15th, 2018)

frama.link/biblissima-iiif-day

#### IIIF in France: software solutions

- → via *LimbGallery* software (I2S):
  - ♦ INHA, Bibliothèque Mazarine, Saint-Omer, Méjanes...
- → via Gallica "White Label" (BnF):
  - Numistral, Bibliothèque francophone numérique, La Grande Collecte...
- → via the CMS Omeka / Omeka-S (IiifServer and UV plugins):
  - NUBIS (BIS Sorbonne), PSL-Explore, Observatoire de Paris, University of Paris 3, University of Grenoble...
- → via Internet Archive:
  - ◆ Bibliothèque Sainte-Geneviève, BIU Santé
- → projects hosted by Huma-Num (IIIF image servers):
  - Navigae, Testaments de Poilus...

## IIIF360 - Services

- → technical or methodological support for the implementation of IIIF APIs into digital libraries (existing or future)
- → advice and assistance in the choice of IIIF-compatible tools (viewers, image servers, annotation tools, etc.)
- → web hosting and publishing solutions for digital images (e.g. through *Nakala/Omeka* provided by Huma-Num)
- → image processing tools, including software libraries to use the JPEG2000 format (*OpenJPEG* or *Kakadu*)

# IIIF360 - Subscribers

- → 21 applications received so far:
  - mostly higher education/research institutions (18), especially for DH projects
  - a few libraries and archives (3)
  - mostly requests for consulting and technical support on IIIF (with Biblissima at the forefront):
    - explain IIIF APIs, their technical requirements, compatible softwares...
    - technological watch on IIIF
    - assistance in writing specifications documents (for public orders)
    - data sharing
    - quality control, validation

#### IIIF360 - A few use cases

- 1. build a new digital library for the digitized collections of an institution
- 2. build a specialized database for research purposes:
  - leverage, enrich, remix existing IIIF contents (add new metadata, annote, aggregate Manifests or Canvases...)
- set up a IIIF viewer to replace an older one and benefit from deep-zoom
- 4. create digital exhibitions to showcase both internal and external IIIF materials
- 5. perform automatic visual pattern recognition processes on large sets of digital images

#### First lessons learned

- → lack of knowledge on IIIF
  - need for training
  - need for more "how-to" documentation in French
- → lack of technical staff in heritage institutions and DH projects
  - need for "turn-key" and generic solutions (predilection for Omeka-based digital libraries, Omeka-S modules)
  - need for shared development efforts
  - need to lobby commercial software vendors to implement IIIF APIs

#### First lessons learned

- → Recurrent questions:
  - how to identify IIIF-compatible resources in the wild?
  - how to reuse and leverage existing IIIF materials in my own application? how to handle both IIIF and non-IIIF materials?
  - does IIIF have an impact on the structure of my database?
  - does IIIF imply that everything should be open without restrictions?

## IIIF360 - Next steps

- → organise a IIIF workshop at the end of 2019
- → continue to meet with project holders, ensure the follow-up of the support...
- → sustain and broaden the service
  - especially within the framework of the Campus Condorcet (DH team / IT services for research units and projects)
  - particularly to be able to support software developments
